

PRODUCT CATALOG

Charcoal is a solid fuel produced by the incomplete combustion of organic materials such as wood or coconut shells, resulting in pure carbon with high heat and stability.

Coconut Charcoal Briquette

Long-lasting, clean coconut shell briquettes, suitable for hookahs and BBQs.

BBQ Charcoal Briquette

The briquettes are specially made for grilling with stable heat and natural flavor.

Our Products

Coconut Charcoal Briquette

Charcoal briquettes made from coconut shells are known to be environmentally friendly, produce stable heat, burn longer, and do not produce acrid smoke, making them widely used for hookahs and barbecues.

BBQ Charcoal Briquette

Special briquettes for grills that provide even heat, are long-lasting, and preserve the natural flavor of food, making them ideal for grilling meat, fish, and chicken.
